ZWGeo

GIS data and surveying tools in ZWCAD

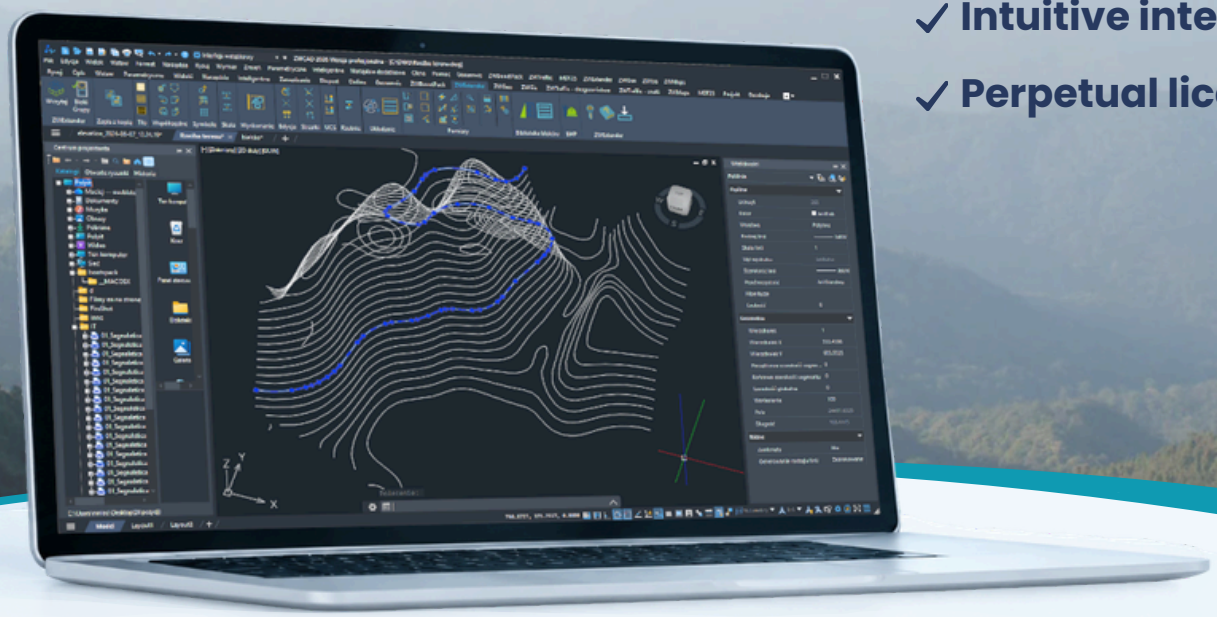

SZANSA

Use symbol library instead of drawing by hand

Import, export and edit industry data

Use practical tools to save time and effort in designing

Work with points and lines, and create tables

- ✓ **Useful functions**
- ✓ **Intuitive interface**
- ✓ **Perpetual licence**

Application made for:

- Surveyors and cartographers
- Design offices
- Administrative offices
- Companies making field surveys

Meet **ZWGeo**

Efficient application for designers and surveyors, that make their work easier

Points and coordinates

- Quick points.
- Import/export of coordinates.
- Labeling points.
- Active point table.
- Making reports.
- Creating tables.

SHP and GML vector data

- Import/export of GML files.*
- Import/export of SHP files.
- Metadata management.
- Searching by attributes and filtering.
- Labeling attributes.
- Creating reports.

*feature currently in beta

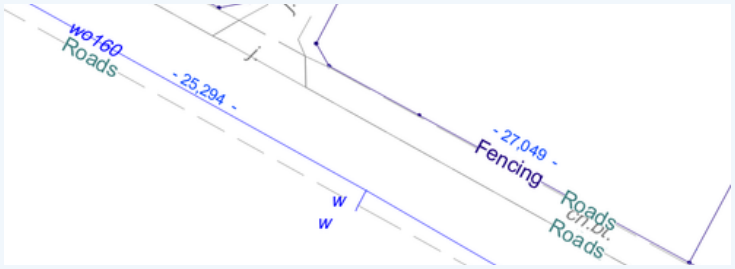

Online maps

- Importing WMS and WFS.
- Inserting maps from OpenStreetMaps.
- Quick selection.
- Creating terrain profiles.
- Visibility management.
- Display management.

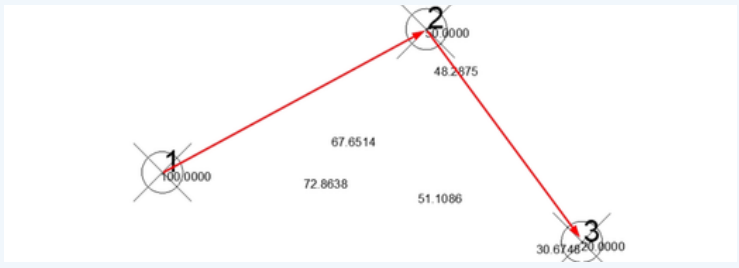

Line management

- Labeling objects with layer name or length.
- Export of coordinates.
- Making tables.
- Labeling middles of polylines with blocks.
- Reversing polylines.
- Rotating text over polyline.

Other

- Picket management.
- Drawing by points.
- Interpolation of surface by points.
- Moving attributes.
- Creating an array of crosses.
- Various quick selection tools.

Try ZWGeo

Test the application for 30 days on your ZWCAD Professional
