ZW Applications

01 ZWTraffic

Made for:

- **road administrators,**
- **design offices,**
- **traffic engineers,**
- **construction offices.**

For road work organisation

- A vast library of vertical and horizontal signs to speed up the work.
- Car park generators.
- Many tools to create custom signs.
- Automatic generation of sign descriptions.
- Creating road geometry.
- Sign generators.
- Passability checking.

It contains everything you need in one package

- Optimal layout on a sheet.
- Dimension management (adding lengths, calculating areas, etc.).
- Health and safety, evacuation and fire safety signs.
- Panel for managing groups, blocks and attributes.
- Creating a line through selected points.
- Saving/loading coordinate systems from a .txt, .csv or .dwg file.
- Synchroniation of views.

02 ZWExtender

Advanced ZWCAD application for block and group management, nesting, area labeling, measurement and more

Made for:

- **CAD designers,**
- **design companies,**
- **ZWCAD users,**
- **constructors.**

03 ZWBoostPack

For all ZWCAD users, whether using Professional or Standard version

It speeds up work and reduces repetitive tasks

- Dimension the entire object with a single button.
- Precise selection tools.
- Group chamfer and fillet.
- Parabole drawing tools.
- Quick background colour change.
- Block management tools.

For 2D map projects

- GIS and map tools.
- The BDOT500 library of topographic elements, that can be placed on map projects without needing to draw it.
- Points, rasters and spatial data support.
- Data import: GML, WMS, WFS, SHP.
- Cost-effective.
- Tools to work on points and lines.
- Easy labeling of objects.

04 ZWGeo

Made for:

- **surveyors and cartographers,**
- **design offices,**
- **local authorities,**
- **companies carrying out fieldwork.**
